

Water Dept. to begin flushing program October 1

The Water Department will begin its annual water main flushing program on October 2 and continue for the following four weeks until its completion. Flushing will be conducted in the evening, between the hours of 8 p.m. and 3:30 a.m., to minimize customer inconvenience.

A listing of streets scheduled for flushing will appear weekly in **The Littleton Independent** and via a recording at 486-3104, ext. 460. The schedule is subject to change without notice based on the progress of the utility specialists, so residents are advised to regularly check the newspaper, consult the website and call the recording for the most current, accurate information.

Residents are also advised to restrict water use while their neighborhood is being flushed to avoid drawing dirty looking, but perfectly safe water into their homes. Fluctuations in water pressure – including periods of low- or no-flow – may occur as well during the flushing, but normal pressure will be restored when the procedure is completed. Residents in the general area of direct flushing may also experience these conditions. The purpose of this yearly maintenance is to remove mineral buildup from the interior surfaces of the water mains. Water is flowed through hydrants in the opposite direction of its normal flow until it runs clear. The schedule appears below.

Flushing schedule Fall 2006
