**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Requirements Not Met for Littleton Water Department**

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the second quarter from April 1, 2005 to June 30, 2005 we did not monitor for Nitrate and therefore cannot be sure of the quality of our drinking water during that time.

A sample was subsequently taken on October 3, 2005 and results indicate that we are well below the drinking water standard for Nitrate. In the past, our sample results have never exceeded, nor approached, the standard.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
