

Power Sentry

Surge Protection for your home

At the Littleton Electric Light Department (LELD) we pride ourselves on the reliability of our system; however, sometimes fluctuations in power occur that are beyond our control. Such instances can be brought on by accidents involving utility poles, weather, or even animal interference. To combat these unforeseen circumstances, we are pleased to offer you **Power Sentry**, a comprehensive power protection program that allows you to purchase top-of-the-line surge suppression equipment directly from us.

We are aware that our customers have increasingly more sensitive, sophisticated equipment and appliances in their homes that need additional safeguarding. Our program consists of a two-tiered approach to power protection by offering both whole-house surge protection and point-of-use surge protection. You may be familiar with point-of-use surge protectors; they are power strips that you plug your computer, television, and stereo into. Whole-house surge protection is a meter-based application that protects hard-wired appliances such as your stove or dryer. While they can be used independently of one another, for optimal protection we advise whole-house in conjunction with point-of-use surge protection.

Whole-house Surge Protection

TESCO's Watt Hour Meter Base Surge Arrester provides strong and dependable protection for your expensive electronic devices and appliances. The Watt Hour Meter Base Surge Arrester is specifically designed for reliability and longevity even with strong lightning activity and temporary line overvoltage conditions. This product must be installed by LELD.

As a user of the TESCO Watt Hour Meter Base Surge Arrester, you are even protected if an electrical surge does get through. In this instance, TESCO warranties equipment in the home against damage from lightning and power surges that come through the electrical system into the house. This warranty covers electromechanical equipment (i.e., washers, dryers, refrigerators and other appliances motor driven or mechanical in nature) and electronic equipment (i.e., computers, televisions, stereos, microwaves and heat pumps). TESCO will replace or repair damaged electromechanical or electric equipment as a result of lightning or power surge passing through a failed TESCO surge arrester, up to \$50,000 per event, for a 10-year period.

\$3.00 per month for a minimum lease period of 3 years

Point-of-use Surge Protection

Panamax offers the best technology in power protection today. The Panamax products are all equipped with a thermal catastrophic fuse. This fuse takes your equipment off line and sacrifices the surge protector to save your electronics. All Panamax products come with a lifetime warranty in addition to a connected equipment warranty. You will find the point-of-use products that LELD is offering listed; however, if you are looking for a specific surge protector that is not listed, please call our Energy Services Department and we will be happy to assist you in finding the right solution for you.

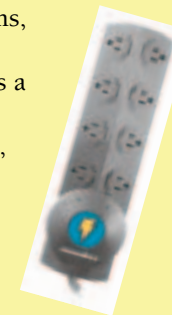

MAX® 2 \$29.00

Unsurpassed protection in a wall mounted, direct plug-in format. Ideal for restricted spaces or isolated equipment such as copiers. The MAX 2 protects 2 AC lines.

POWERMAX® 8 TEL \$35.00

For computers with standard modems, the POWERMAX TEL protects 8 AC lines and 1 telephone line. It features a 6-foot power cord, master on/off switch, protection-on indicator light, 2 modular phone jacks (RJ-11/45 compatible, pins 4,5 protected), and a 7-foot phone line. UL Listed, CSA Certified.

POWERMAX® 8 COAX \$35.00

An exceptional value for protecting AC and COAXIAL wiring found in your home electronics like televisions, VCRs, and cable modems, the POWERMAX COAX protects 8 AC lines and 1 coax line. It features a 6-foot power cord, master on/off switch, protection-on indicator light, one in/out coax connector, and one coax jumper cable. UL Listed, CSA Certified.

POWERMAX® 8 DBS+ \$75.00

The surge protector to turn to for complete satellite and connected equipment protection. With a one-nanosecond response time, the POWERMAX DBS+ provides electrical surge protection for 8 AC lines (television, stereo and VCR hookups), 1 satellite coaxial line, 1 cable TV (antenna) coaxial line, 1 additional TV coaxial line and 1 telephone line - all in one compact unit.

AC Extension Cord \$5.00

The Panamax-approved 10-foot, 15 ampere extension cord. Please note that you must use this extension cord with these products in order to validate your Panamax warranty. UL Listed, CSA Certified.

Minuteman UPS

\$173.00

Designed with 4 receptacles (3 battery backup and 1 surge), these uninterruptible power supplies provide protection for your computer against power outages. The Pro 320 also has a jack to protect phone or data lines.

GenerLink™

GenerLink™ is a portable generator interconnection device that allows you to use your generator more safely. It is easily installed behind your electric meter and requires no rewiring of your electrical system. With GenerLink™ you have the flexibility to run virtually any appliance, up to the capacity of the generator, by simply energizing appliances from

your breaker panel. GenerLink™ detects when a generator is operating and automatically disconnects from the utility grid, eliminating dangerous backfeed. Once you purchase GenerLink™, LELED personnel will install it. For more details please contact Energy Services.

Protect your equipment with Power Sentry

For more information regarding this program please contact Energy Services. We will be happy to talk with you about a specific application or provide you with more information on any of the products listed in this brochure.

If you would like to order any of the products in the brochure, please stop by our office or call and we can have the products available for pick up within one week. If you are interested in the whole-house surge protector or GenerLink™ you must call to arrange a time for our Electric Services Technician to come to your home to install it.

We are happy to bring you these products as part of our continuing effort to provide you with the best possible service.
