Water dept. sets Oct. 15 deadline for new water service requests

LITTLETON – Because of a backlog of new service requests and the need to complete those projects before the ground freezes, the Water Department has set an October 15 cutoff date for all new requests for water service on existing public roads.

Those who anticipate the need for water service this season are advised to apply at the water department at their earliest convenience so that service requests may be scheduled accordingly. The department will make every attempt to satisfy requests on a first-come, first-served basis as weather permits, but asks customers to observe the October 15 cutoff date.

After the winter months, the department will resume its practice of accepting new water service requests on a regular basis.
