Advanced Metering Infrastructure (AMI) Opt-Out Form

Effective Date: July 1, 2020

The Littleton Electric Light & Water Department (LELWD) has set out to replace all customer connections with AMI (Advanced Metering Infrastructure) due to the existing AMR meters being at their end of life. There is no fee for LELWD to replace your meter.

LELWD customers have the option to opt-out of the AMI program, as written in the *Advanced Metering Infrastructure Opt-Out Policy* and by understanding and completing the form below:

Name: _____
Account Number: _____
Service Address: _____
Town: _____ Zip: _____
Phone: _____
Email: _____
Opt-Out Option: Tier I (Soft) Tier II (Hard)

Description of Opt-Out options are on the back of this form.

Tier II (Hard) - You are acknowledging that your electric account will be subject to the addition of the AMI Opt-Out Charges as follows when applicable:

Electric Service:	
Manual Reading Charge [MDPU 196] (monthly)	\$25.00
Removal of the AMI Meter and Installation of Non-AMI Meter	\$100.00
Re-Installation of AMI Meter	\$100.00

Your Signature: _____ Date: _____

Opt-out customers must notify LELWD if they want to have an AMI meter re-installed. The monthly manual meter read charge will be removed from the electric account once the AMI meter has been installed and operational.

Customers who do not want their home to be fully equipped with AMI will have two options to “opt-out”. If an opt-out option is chosen, it will be applied to both the Electric and Water service if applicable.

- **Tier I (Soft)** opt-out will restrict the AMI meter to only transmit Electric meter reads once per month for billing purposes only. This eliminates all the additional benefits of having an AMI meter (detecting power outages, understanding your electricity use, etc.). There is no additional charge for Tier I opt-out.
- **Tier II (Hard)** opt-out will leave the existing non-AMI meter in place, or replace it with a similar non-AMI meter at the Department’s sole discretion. Tier II opt-out will result in the addition of monthly fees to cover the cost of manual reading and billing. If a customer with both electricity and water service chooses to opt out of the electric AMI meter, they must also opt out of the water AMI meter, as the water meter relies on the electric meter for network communication. Additional charges will be applicable (See LWD Manual Meter Read Policy).
