

Job Opening GIS Intern

A position is available with the Littleton Electric Light and Water Departments for a GIS Intern.

Under the supervision of the Engineering Technician, the GIS Intern will assist in the collection of data, updating and editing of a Geographic Information System (GIS) map and related databases; perform field collection of GPS data and imaging; perform research and development of applications to assist in the operation of the electric distribution system. These tasks will be accompanied by assisting the Engineering Department with projects as needed.

The successful applicant must be able to properly use personal safety equipment necessary for the operation of a high voltage distribution system and must hold a valid Class D Massachusetts Driver's License.

A job description and requirements are available on our website, www.lelwd.com.

Resumes will be received by Chris Adley, Engineering Technician, via email, cadley@lelwd.com, until the job is filled.
